*Allowable Subject Matter*

1. Claims 1-25 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to the independent claims 1, 4, 10-13, and 17, prior art fails to disclose or make obvious, in combination with other recited features of the claim limitations, a deflector in a charged particle beam exposure apparatus comprising: an electrode substrate having a plurality of through holes and an electrode pair made up of first and second electrodes which oppose side walls of each through hole in order to control a locus of a charged particle beam passing through the through hole; and a wiring substrate having connection wiring pads connected to said electrode pairs of said electrode substrate to individually apply a voltage to said electrode pairs, wherein said electrode substrate and substrate are bonded via wiring said connection wiring pads of said wiring substrate.

With respect to the independent claims 19-24, prior art fails to disclose or make obvious, in combination with other recited features of the claim limitations, a deflector comprising: an electrode substrate having a plurality of through holes and an electrode pair made up of first and second electrodes which oppose side walls of each through hole in order to control a locus of a charged particle beam passing through the through hole; and a wiring substrate obtained by stacking a first wiring layer having a first interconnection for applying a first voltage to said first electrode and a second wiring layer having a second interconnection for applying a second voltage to said second electrode.

The dependent claims 2-3, 7-9, 14-16, and 18 are allowable by virtue of their dependence upon the independent claim 1. The dependent claims 5 and 6; and 25; are allowable by virtue of their dependence upon the independent claims 4 and 22, respectively.

### *Drawings*

3. Figures 1, 2, 3, 4A, and 4B, should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### *Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Both Saitou et al. (5,162,240) and Yasuda et al. (5,260,579) disclose a charged particle beam exposure apparatus and method for fabricating electric circuit patterns using thick and thin film hybrid multilayers wiring substrates.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
